This guide will show you how to change the Windows Operating System GUI Language. This can be done on any machine in the MLTC.

1. On the desktop you will see a "Change Windows Display Language" icon. Click this to open the "Keyboards and Languages" dialog menu.

2. Select which language you would like the OS to use under the "Choose a Display Language" Prompt.

Regior	and Language
Formats	Location Keyboards and Languages Administrative
Keybo To cl	oards and other input languages hange your keyboard or input language click Change keyboards.
	Change keyboards
How	do I change the keyboard layout for the Welcome screen?
Displa	ay language
Insta whe	all or uninstall languages that Windows can use to display text and re supported recognize speech and handwriting.
010	🚱 Install/uninstall languages
Cho	ose a display language:
Eng	Jlish 👻

How c	an I install additional languages?
	OK Cancel Apply
3055	

3. When you have finished, please select "OK" to save and close this dialog. You will have to log off and log back in for the changes to take effect.

Please note: In some cases you may have to log off and on a second time for all portions of the UI to reflect the language switch.
